STATS VOLUME (L) **95** WEIGHT (KG) **6.7** LENGTH (CM) **240**
WIDTH AT WIDEST POINT (CM) **61** CONSTRUCTION **CARBON KEVLAR**
FIN (CM) **FW G10 FIN 27**

BOARDS AND MORE SURF CENTRE

You'll like... The throw about feel and impressive control in any conditions

You won't like... Occasionally loosing ground to faster models

Why not try... Opting for a smaller fin in stronger winds to get a more radical ride.

FROM THE BEACH

The Fanatic has good acceleration from the beach. With a domed deck and the usual neat straps and pads getting up and planing is effortless. Although not noticeably fast The Fanatic is probably the most controllable of the freewave boards. Sitting well on the water, holding it's line brilliantly even when the wind and chop picks up. Taking an upwind line although with soft rails the board heads well driving off the 27cm fin and using the shape of the deck to help get you where you want. When it comes to cranking into a gybe the turn is naturally smooth with the ability to crank it harder if you want it to.

SHOWING OFF

When it comes to impressing others the Fanatic is one of the best for freestyle. The board feels very compact and although still good in a straight line we felt the Freewave was better than most when it came to maneuvering. Good width throughout means getting pop is really easy and with volume evenly

distributed, pulling off any freestyle moves is nearly as easy as with a real freestyle board. The tail tapers away well making riding in small waves a lot of fun. The rocker seems a bit flat for bigger waves but with great carving characteristics you can have loads of fun both front side and backside and in onshore waves. In the air the Fanatic stays in complete control and the compactness of the board gives you the impression you are sailing something smaller.

SUMMING UP

The fanatic is a brilliant freewave board. Performing well in bump and jump and wave conditions for an all round board there seem to be no limits.

HISTORY OF THE FANATIC FREEWAVE

Some smaller changes on rails, rocker, v and outline, a new more compact design was born.

TIPS FROM THE TOP

The supplied fin is for general use, bigger or smaller fins will suit your style even more.
